West Feliciana Hospital named a 'Top Hospital'

For the third straight year, West Feliciana Hospital has been named one of Louisiana Life magazine's Top Hospitals in Louisiana. The designation is based on queries of patients conducted by Medicare each year and published at medicare.gov. The information is compiled and evaluated by New Orleans-based Louisiana Life and the one-of-a-kind list shows the state's hospitals according to locality.

To qualify for the list, at least 60 percent of the patients queried had to give the hospital a top overall ranking of 9 or 10. These are the top general service hospitals as seen through the eyes of those who have experienced them firsthand – the patients.
